# EXPERIMENT 5

NAME: JAI VARDHAN UL REG NO:240701201

AIM:

To perform task analysiss and design the user flow of a Turf Slot Booking System.

## Task Analysis

Task Analysis is the process of breaking down a user's interaction with a system into smaller steps to understand how users complete their goals. It helps identify user needs, problems, and areas where the system can be improved.

## Key Aspects of Task Analysis

- Understanding what tasks users perform
- Identifying the sequence of actions required to complete the task
- Analyzing possible difficulties faced by the user
- Improving the efficiency and usability of the system

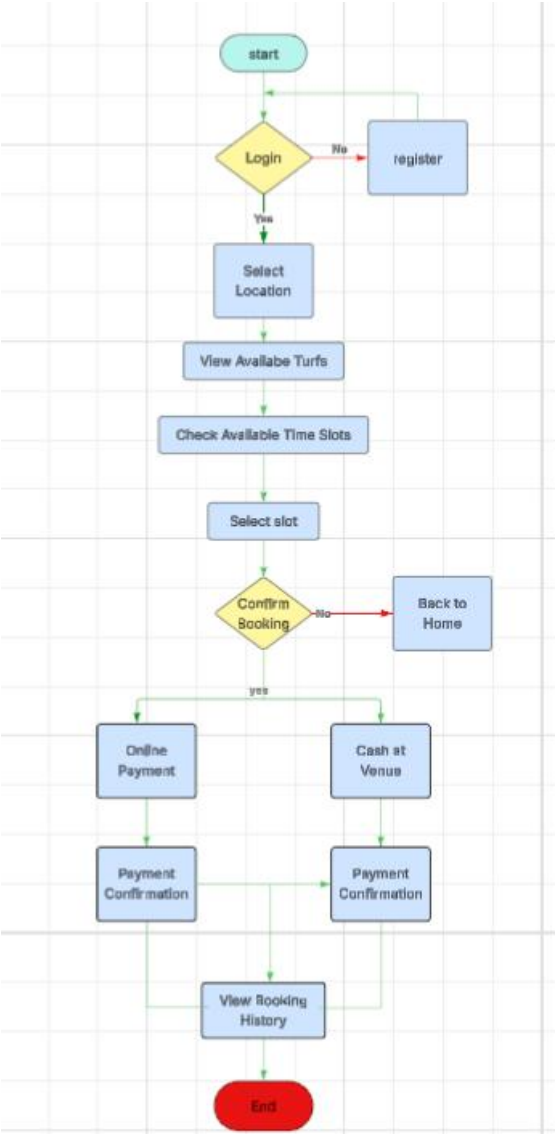
## User Flow

User Flow shows how users navigate through the application to complete a particular goal.

## User Flow for a Turf Slot Booking System

Start → Open App → Login/Register → Select Location → View Available Turfs → Select Turf → Check Available Time Slots → Select Slot → Confirm Booking → Enter Player Details → Choose Payment Method → Make Payment → Booking Confirmation → View Booking History

# User flow for an Turf Slot Booking System



## Workflow (Step Wise)

**Step 1:**
The user opens the Turf Booking application.

**Step 2:**
The user logs into the application using their username and password.

**Step 3:**
If the user does not have an account, they can register by creating a new account.

**Step 4:**
After successful login, the user selects the desired location.

**Step 5:**
The system displays the list of available turfs in that location.

**Step 6:**
The user selects a turf to view its available time slots.

**Step 7:**
The system shows the available booking time slots for the selected turf.

**Step 8:**
The user selects a preferred time slot.

**Step 9:**
The user confirms the booking details.

**Step 10:**
If the user does not confirm the booking, they are redirected back to the home screen.

**Step 11:**
If the user confirms the booking, they choose a payment method.

**Step 12:**
The user can select either **online payment** or **cash at the venue**.

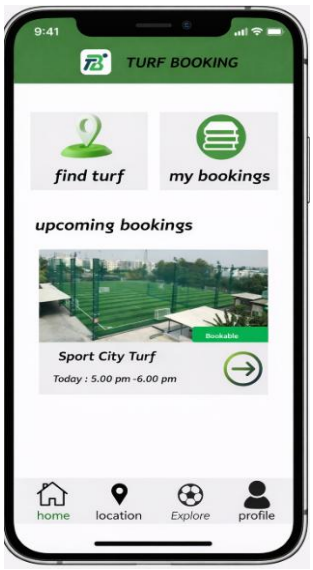
**Step 13:**
After the payment process is completed, the system shows the payment confirmation.

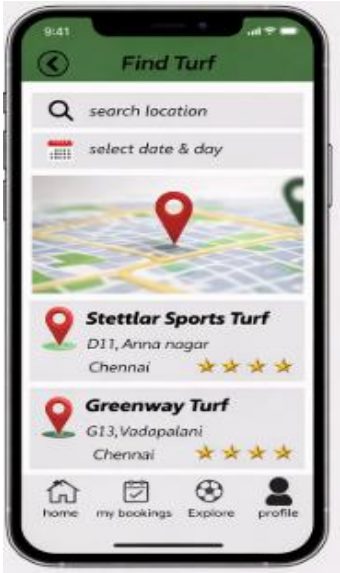
**Step 14:**
The booking details are saved in the user's booking history.

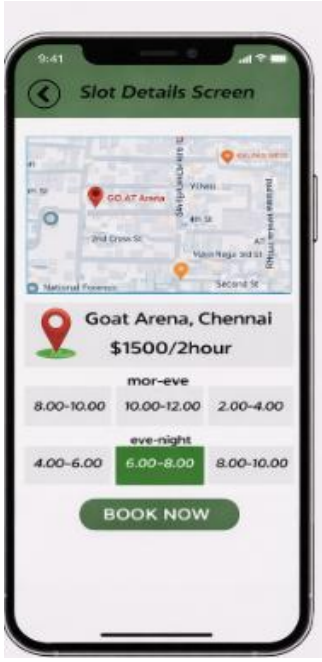
**Step 15:**
The user can view the booking details in the **My Bookings / Booking History** section.

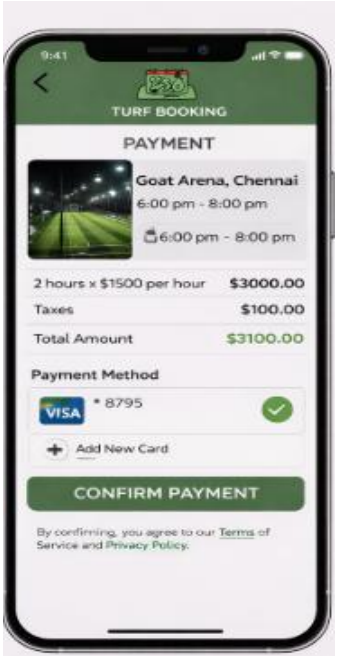
**Step 16:**
The process ends.

# WireFrame for the Task Analysis









**1.Login Screen**

**Purpose:** User enters the app.

**Explanation:**
This is the login page of the Turf Booking application. The user enters their **username** and **password** to access the application. If the user already has an account, they can click the **Login button**. If the user does not have an account, they can click the **Register button** to create a new account.

**2. Home Screen**

**Purpose:** Main dashboard of the app.

**Explanation:**
This is the home screen of the Turf Booking app. It shows two main options: **Find Turf** and **My Bookings**. The user can search for available turfs by selecting **Find Turf**. The screen also displays **upcoming bookings**, so the user can quickly view their next reservation.

**3. Find Turf Screen**

**Purpose:** Search turfs based on location.

**Explanation:**
This screen allows the user to search for turfs based on **location and date**. The system displays a list of available turfs along with their **address and ratings**. The user can choose a turf from the list to continue the booking process.

**4. Slot Details Screen**

**Purpose:** Select a time slot.

**Explanation:**
This screen shows the **selected turf location and price per hour**. It also displays the **available time slots** for booking. The user can select their preferred time slot and then click the **Book Now button** to proceed to the next step.

**5. Payment Screen**

**Purpose:** Confirm and pay for the booking.

**Explanation:**
This screen shows the **booking details**, including turf name, location, selected time slot, price per hour, and total amount. The user chooses a **payment method** and clicks **Confirm Payment** to complete the booking.

**6. Profile Screen**

**Purpose:** View user information and booking history.

**Explanation:**
This screen displays the **user profile information**. The user can access **settings**, view **my bookings**, and check their **upcoming reservations**. The user can also **logout** from the application from this screen.
